

FENS

REGIONAL MEETING

20-23 SEPTEMBER 2017. PÉCS, HUNGARY

The regional FENS meeting in Pécs will focus on the most recent discoveries in neuroscience from molecules to behaviour, highlighting discoveries of translational potential. In addition to the wide range of scientific insights a special emphasis will be placed on cutting-edge technologies. The conference will be held for four days and will include six plenary speaker sessions, numerous symposia and poster sessions.

PLENARY SPEAKERS

- **Thomas Südhof** Nobel Prize in 2013 (Stanford University, Howard Hughes Medical Institute, USA)
- **Attila Losonczy** (Columbia University Medical Center, USA)
- **Hannah Monyer** (University of Heidelberg, Germany)
- **Anders Björklund** (Neuroscience Center, University of Lund, Sweden)
- **Akihiro Kusumi** (Kyoto University, Japan)
- **István Módy** (UCLA, Brain Research Institute, USA)

CALL FOR SYMPOSIUM PROPOSALS

Deadline: 18 September, 2016

The high-end conference centre

Conference venue: In 2010 Pécs was one of the three cultural capital cities of Europe. This occasion served as a great purpose to build and design several new buildings, among these the Kodály Centre, with the Conference Centre and the Concert Hall.

Early bird registration: 15 March, 2017

Travel grant application: 31 May, 2017

Abstract submission: 31 May, 2017

Special events and programs • "Meet the Nobel Prize winner" • "Meet the Brain Prize winner" • "NEURART": Neuroscience and Art exhibition • Scavenger hunts with the brain • "Touch the Brain" activity • Laboratory visits • Brain Awareness Events – Brain Exhibition • "Brain Bridge" Outreach Program – brain awareness from the youngest generation (PhD students are involved as instructors)

Non-scientific programs • plenty of festivals in Pécs from spring to late autumn • Villány wine region • sightseeing tour in Budapest
